PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building scalable web and mobile applications using **React.js**, **React Native**, **Node.js**, and **MongoDB**. Strong expertise in **AI integration**, **NLP pipelines**, and **performance optimization**, combined with practical knowledge of **Git**, **Docker**, **CI/CD**, and **cloud deployment**.

Hands-on experience with **vector databases**, **semantic search**, and **embedding models (MiniLM, FAISS, ONNX)**, enabling intelligent data processing and real-time analytics. Strong understanding of **software engineering principles**, **data structures**, and **system design**, with the ability to build **production-ready**, **maintainable**, and **user-centric applications**.

Proven ability to develop **end-to-end products**, from architecture design to deployment, with a focus on **real-world problem solving** and **user-centric solutions**.

EDUCATION

Master of Computer Applications (MCA) <i>Bharati Vidyapeeth Institute of Management & IT (BVIMIT), Navi Mumbai</i>	<i>Sep 2025 – Present</i>
B.Sc. in Computer Science <i>N.E.S. Ratnam College of Arts, Science & Commerce, Mumbai</i>	<i>2022 – 2025</i>
Higher Secondary (PCMB) <i>Raminiranjan Jhunhunwala College, Mumbai</i>	<i>2021 – 2022</i>

TECHNICAL SKILLS

Languages: Proficient in JavaScript, Python, and Java for versatile application development.

Frontend: Experienced in building responsive interfaces with React.js, React Native, HTML5, and CSS3.

Backend: Skilled in developing robust server-side logic using Node.js, Express.js, and REST APIs.

Databases: Adept at managing data with MongoDB, PostgreSQL, MySQL, and Firebase Firestore.

AI / ML: Hands-on experience with MiniLM, FAISS, ONNX, NLP, and LLM integration (Gemini, OpenAI).

DevOps: Expertise in Docker, CI/CD pipelines, and cloud deployment using Render, Railway, and Vercel.

Version Control: Expertise in collaborative development using Git & GitHub.

PROJECTS

Multilingual Duplicate Detection System | 2nd Prize – Innov8 Hackathon (Pixels 2026)

Python, MiniLM, FAISS, ONNX, Streamlit

- 2nd place among 50+ teams; built cross-lingual duplicate detection system.
- Used MiniLM embeddings + FAISS for fast semantic similarity search.
- Optimized inference with ONNX for high-speed CPU performance.
- Developed Streamlit app for real-time detection and cleaning.
- Led backend & pipeline; contributed to frontend productization.

RealtorBazar – Real Estate Listing Platform (Client Project)

March 2026 – April 2026

Full-Stack Web Application | React.js, Node.js, MongoDB, Admin Dashboard

- ▶ Live Demo: <https://realtorbazar.com>
- ▶ Developed and deployed a real-estate web platform for a property broker client to manage listings.
- ▶ Built an admin dashboard to add, update, and manage property details, pricing, and images dynamically.
- ▶ Integrated REST APIs using Node.js and Express.js for backend property management operations.

Inventory Management System – Mumbai University Project

Dec 2025 – April 2026

Institutional Full-Stack Web Application | React.js, Node.js, MySQL

- ▶ Developed a full-stack inventory and record management system for Mumbai University examination department operations.
- ▶ Implemented modules for purchase entries, challans, billing, stock issue, and ledger-based reporting workflows
- ▶ Built role-based admin functionalities, audit logs, vendor/item management, and responsive dashboard interfaces using React.js and Node.js.

MindGuard – On-Device Mental Health Detection App

Feb 2026 – Mar 2026

Android Application | React Native, Firebase, Isolation Forest, Node.js

- ▶ Developed an AI-powered Android application for detecting behavioral deviation patterns using on-device anomaly detection techniques.
- ▶ Built privacy-first behavioral monitoring modules for screen time, app usage patterns, mobility trends, and night-time device activity.
- ▶ Implemented Isolation Forest-based risk scoring with CalmBot intervention, guardian alerts, live location sharing, and Firebase-powered communication workflows.

StudyBuddy – AI-Powered Adaptive Learning Platform

Oct 2025-Nov 2025

Full-Stack Web App | React.js, Node.js, MongoDB, Google Gemini API

- ▶ **Live Demo:** <https://studybuddy-kc2m.onrender.com/>
- ▶ Built and deployed a full-stack AI-driven learning platform delivering personalised study recommendations based on learner performance.
- ▶ Designed end-to-end architecture covering React.js frontend, Node.js/Express.js backend, MongoDB database, and cloud deployment on Render.
- ▶ Integrated Google Gemini API and Gitpath for dynamic content generation and adaptive quiz personalisation.

SEMINARS

- ▶ Cybersecurity Seminar – Ethical Hacking, Network Security, and Data Privacy
- ▶ AI & Machine Learning Seminar – Neural Networks, NLP, and Predictive Analytics

CERTIFICATIONS

- | | |
|--|----------|
| ▶ NPTEL Cloud Computing (Top 5% performer) – IIT Kharagpur Elite Silver 86% | May 2026 |
| ▶ NPTEL Fundamentals of Object Oriented Programming – IIT Roorkee Elite Silver 77% | May 2026 |
| ▶ Full-Stack Web Development – DevTown | Jan 2025 |
| ▶ Web Development Training – Internshala & Skill India/NSDC | Jul 2025 |
| ▶ Essentials Automation Certification – Automation Anywhere | May 2026 |

ACHIEVEMENTS

Secured **2nd Prize among 60+ teams** at Innov8 Hackathon – Pixels 2026, for building an AI-based multilingual duplicate detection system, hosted at SIES College of Management Studies.
