PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building scalable web and mobile applications using **React.js**, **React Native**, **Node.js**, and **MongoDB**. Strong expertise in **AI integration**, **NLP pipelines**, and **performance optimization**, combined with practical knowledge of **Git**, **Docker**, **CI/CD**, and **cloud deployment**.

Hands-on experience with **vector databases**, **semantic search**, and **embedding models (MiniLM, FAISS, ONNX)**, enabling intelligent data processing and real-time analytics. Strong understanding of **software engineering principles**, **data structures**, and **system design**, with the ability to build **production-ready**, **maintainable**, and **user-centric applications**.

Proven ability to develop **end-to-end products**, from architecture design to deployment, with a focus on **real-world problem solving** and **user-centric solutions**.

EDUCATION

Master of Computer Applications (MCA) <i>Bharati Vidyapeeth Institute of Management & IT (BVIMIT), Navi Mumbai</i>	Sep 2025 – Present
B.Sc. in Computer Science <i>N.E.S. Ratnam College of Arts, Science & Commerce, Mumbai</i>	2022 – 2025
Higher Secondary (PCMB) <i>Raminiranjan Jhunjhunwala College, Mumbai</i>	2021 – 2022

TECHNICAL SKILLS

Languages: Proficient in JavaScript, Python, and Java for versatile application development.
Frontend: Experienced in building responsive interfaces with React.js, React Native, HTML5, and CSS3.
Backend: Skilled in developing robust server-side logic using Node.js, Express.js, and REST APIs.
Databases: Adept at managing data with MongoDB, PostgreSQL, MySQL, and Firebase Firestore.
AI / ML: Hands-on experience with MiniLM, FAISS, ONNX, NLP, and LLM integration (Gemini, OpenAI).
DevOps: Expertise in Docker, CI/CD pipelines, and cloud deployment using Render, Railway, and Vercel.
Version Control: Expertise in collaborative development using Git & GitHub.

PROJECTS

Multilingual Duplicate Detection System | 2nd Prize – Innov8 Hackathon (Pixels 2026)

Python, MiniLM, FAISS, ONNX, Streamlit

- 2nd place among 50+ teams; built cross-lingual duplicate detection system.
- Used MiniLM embeddings + FAISS for fast semantic similarity search.
- Optimized inference with ONNX for high-speed CPU performance.
- Developed Streamlit app for real-time detection and cleaning.
- Led backend & pipeline; contributed to frontend productization.

Depression Risk Detection – Android App (React Native)

Feb 2026 – March 2026

Mobile Application | React Native, Expo, AI APIs, Node.js

- ▶ Currently building an Android application that detects depression risk through conversational AI-driven assessment and behavioural pattern analysis.
- ▶ Leveraging React Native & Expo for cross-platform mobile development with a native Android feel.
- ▶ Integrating Google Gemini API for NLP-based mood and sentiment analysis, and generating personalised mental-health insights.
- ▶ Designing a Node.js backend to handle secure data storage, user history, and risk-scoring algorithms.
- ▶ Prioritising privacy-first architecture with encrypted storage and anonymised analytics.

StudyBuddy – AI-Powered Adaptive Learning Platform

Oct 2025-Nov 2025

Full-Stack Web App | React.js, Node.js, MongoDB, Google Gemini API

- ▶ **Live Demo:** <https://studybuddy-kc2m.onrender.com/>
- ▶ **Source Code :** github.com/shravanbpatel954/studybuddy
- ▶ Built and deployed a full-stack AI-driven learning platform delivering personalised study recommendations based on learner performance.
- ▶ Designed end-to-end architecture covering React.js frontend, Node.js/Express.js backend, MongoDB database, and cloud deployment on Render.
- ▶ Integrated Google Gemini API for dynamic content generation and adaptive quiz personalisation.

Prepa – AI-Powered Interview Preparation Platform

2024

Full-Stack Web App | React.js, Firebase, Speech-to-Text, AI Analytics

- ▶ **Live Demo:** <https://prepa-d7e15.web.app/>
- ▶ **Source:** github.com/shravanbpatel954/Prepa-AI-Interview-Prep
- ▶ Designed and developed a full-stack interview prep platform with video recording, speech-to-text transcription, and AI-driven performance analytics.
- ▶ Integrated Firebase for authentication, Firestore as the backend, and Google Speech-to-Text for real-time answer transcription.
- ▶ Built AI evaluation workflows that score responses and surface personalised feedback to users.

AIO – Academic Information Organiser

2025

Full-Stack Web App | React.js, Node.js, MongoDB

- ▶ **Live Demo:** <https://aio-5igz.onrender.com/>
- ▶ **Source:** github.com/shravanbpatel954/AIO-AI-Advisor
- ▶ Built a centralised academic information portal to help students organise schedules, deadlines, and resources.
- ▶ Focused on user-friendly design, efficient data management, and a clean REST API layer.

CERTIFICATIONS

- ▶ Full-Stack Web Development – DevTown
- ▶ Web Development Training (8 Weeks) – Internshala Trainings | Dual Certified: Skill India / NSDC & Internshala (Issued July 2025)

Achievements

- Secured **2nd Prize among 50+ teams** at Innov8 Hackathon – Pixels 2026, hosted at SIES College of Management Studies
- Built a **cross-lingual AI-based duplicate detection system** using MiniLM, FAISS, and ONNX
Engineered a **high-performance NLP pipeline** for semantic similarity search and real-time duplicate detection
